

Papers Published in National Journals

1. Gupta, V.K. and Gupta, A.K. (1985): Study of the system leucite- akermanite-SiO₂ under one atmospheric pressure. *Ind. J. Earth Sci.*, 12, No. 2,125-139.
2. Das Sharma, S., Gupta, A.K., and Ray, S. (1985): Phase relation in the system CoO-MgO-Fe₂O₃ at variable temperature under atmospheric pressure. *Ind. J. Earth Sci.*, 12, 3, 173-178.
3. Hareendran, A., and Gupta, A.K. (1985): Phase equilibria study of the system NaAlSiO₄ (nepheline)-LiAlSiO₄ (eucryptite) at different temperatures under atmospheric pressure. *Ind. J. Earth, Sci.*, 12, 117-124.
4. Mukherjee, P.K. Gupta, A.K., Chatterjee, V.P. (1985): Viscosity determination of some rhyolites, and pitchstones of variable temperature under atmospheric pressure. *Ind. J. Earth. Sci.* 12, No. 3, 165-175.

57. Gupta, A.K. (1987): The nature of crust-mantle boundary and compositional variation of magma in the light of experimental evidence. *Cur. Sci.* 56, No. 4, 179-80
58. Gupta, A.K., LeMaitre, R.W. Yagi, K. (1989): Melting studies on rhyolites and trachytes under fO₂ conditions at different temperatures under atmospheric pressure. In *Proc. of Second Indo-Soviet Workshop on Experimental Mineralogy and Petrology*, Chemkent, USSR, (eds, Gupta et al., 32-39.
59. Gupta, A.K. and Yagi, K. (1989): Geochemical and microprobe studies of six diamond-bearing ultramafic pipes from central and south India. In *Proc. of Second Indo-Soviet workshop on Experimental Mineralogy and Petrology*, Chimkent, USSR (eds. Gupta et al.), 116-132.
60. Gupta, S.K., Sharma, S.D. and Gupta A.K. (1989): Surface tension measurement of a tholeiitic picrite and an olivine tholeiite at variable temperatures under atmospheric pressure. *Proc. of the first Indo-soviet Workshop on Experimental Mineralogy and petrology*, (eds. V.K. Gaur and A.K. Gupta), 47-52.
61. Bansal, N., Litvin, Yu. A. and Gupta, A.K. (1989): Phase relations in the join forsterite-plagioclase (Ab₅₀An₅₀) under 35 kb at variable temperatures. In *Proc. of second Indo-Soviet Workshop on Experimental Mineralogy and Petrology*, Chemkent, USSR, (ed. Gupta et al.) 133-138.
62. Chatterjee, V.P., Gupta, A.K. and Yagi, K. (1989): Geochemistry and evolution of carbonatite-alkalic complex of Ambadungar, Gujrat (India). In: *Proc. of the second Indo Soviet Workshop on experimental Mineralogy and Petrology*, Chemkent USSR (Eds Gupta, et al.,) 139-164.
63. Das Sharma, S., Gupta A.K. and Ray, S. (1989): Magnetism and Mossbauer spectroscopy of ferrimagnetic spinels in CaO-MgO- Fe₂O₃ system. In: *Proc. of*

Second Indo-soviet Workshop on Experimental Mineralogy and Petrology, Chimkent, U.S.S.R. (eds. Gupta et al.), 1-8.

64. Pati, J.K., Gupta, A.K. (1989): Preliminary result on the liquidus surface of the system diopside-nepheline-albite at variable temperatures and constant pressure of 28 kb. In Proc. of Second Indo-Soviet Workshop on Experimental Mineralogy and Petrology, Chimkent USSR (eds. Gupta et al.), 72-76.
65. Prusheth, K.L., Sharma, S.D. and Gupta A.K. (1989): Viscosity determination of an olivine tholeiite and a tholeiitic andesite at variable temperatures under atmospheric pressure. Proc. of First Indo-Soviet Workshop on Experimental Mineralogy and Petrology, (eds V.K. Gaur and A.K. Gupta), 53-60.
66. Mukherjee, P.K. Gupta, A.K., and McLaughlin, R.J.W. (1989): Petrogenesis of evolution of Pavagarh lava flow of Gujarat, India, In: Proc. of Second Indo-Soviet Workshop on Experimental Mineralogy and Petrology, Chimkent USSR (eds Gupta et al.) 84-104.
67. Singh, P., Chopra, R. and Gupta A.K. (1990): Phase equilibria study of the system nepheline-diopside under variable pressure (up to 28) and temperatures. Spec. Issue on Experimental Petrology (ed, Gupta, A.K.) Proc. Indian Acad. Sci. (Earth Planet, Sci. 99(1), 49-55.
68. Gupta, A.K. and Yagi, K. (1990): Geochemistry and microprobe studies of six diamond-bearing ultramafic pipes from central and south India. In: Proc. Second Indo-Soviet workshop on Experimental Mineralogy and Petrology, Chimkent, U.S.S.R. October 1989. Gupta, A.K., Gaur, V.K., Zharikov, V.A. Chudianovskhi L.T. and Ishbulatov, R.A., Govt. of India. Dept. Sci. Technology 116-132.
69. Agrawal, S., Bindal, M.M. and Gupta A.K. (1990): High Pressure temperature study on an olivine tholeiite and a tholeiitic picrite from the Pavagarh Region, Gujarat (India). Spec Issue on Experimental Petrology (ed., A.K. Gupta) Proc. Indian Acad. Sci. (Earth Planet. Sci.), 99(1), 91-98.
70. Gupta, A.K. (1992): The Mystery about the Earth, Everyman's Science, Vol. XXVI No. 6, 191-199.
71. Gupta, A.K. and Venkatesh, T.L. (1993): Experimental studies on synthetic reichterite and its implications, Ind, Jour. Earth Sci. 20, 67-70.
72. Pati, J.K. and Gupta A.K. (1993): The study of the join nepheline- diopside-albite in presence of excess water at 2 and 10 kbar with reference to the genesis of phonolitic magma, Ind, Jour. Earth Sci. 20, 71-77.

73. Singh, P. and Gupta, A.K. (1993): Genesis of a melilite free, nephelinitic liquid with reference to the study of the join nepheline-diopside up to 10 kbar. *Ind. Jour. Earth Sci.* 20, 87-95.
74. Bansal, N. and Gupta, A.K. (1993): Experimental study on the join forsterite-albite-anorthite at 35 kbar and its significance on the upper mantle petrology, *Ind. Jour. Earth Sci.* 20, 104-116.
75. Shaw, R.K., Venkatesh T.L. and Gupta A.K.(1993): Experimental Study of the System Fluorapatite-Chlorapatite Under 10 and 12 Kbar at 640, 750 and 900°C: *Nat. Acad. Sci. Lett.* 16, 27-35.
76. Mazumdar, R., Venkatesh, T.L. and Gupta A.K. (1993): Experimental Study of the System Grossularite-Spessertine at $P_{H_2O} = P_{Total}$ 1 kbar and variable temperatures. *Nat. Acad. Sci. Lett.* 16, 8-15
77. Kar, R. and Gupta, A.K. (1993): Experimental Studies on the System Phlogopite-Mn-Phlogopite at 1 and 10 Kbars and Variable Temperatures in Presence of Excess Water under NNO Buffer Conditions, *Nat. Acad. Sci. Lett.* 16, 17-21.
78. Bansal, N. and Gupta A.K. (1993): Phase equilibria study of the join forsterite-albite-anorthite at 28 kbar and its petrological significance. *Proc. Nat. Acad. Sci.* 63 (Saha -Vol. ed, S.K. Sen), 119-133.
79. Gupta A.K. (1996): Evolution of the Mantle and Core of the Earth: Convective Cycle within the Mantle and Different Plate Tectonic Environment Related to Magma Generation: *Current Science* 70(11), 961-969.
80. Gupta, V.K. and Gupta A.K. (1997): Phase relations in the system leucite-akermanite-albite-SiO₂ under one atmospheric pressure (Yagi K. Volume), (eds. Gupta A.K., Onuma, and Arima M.) Allied Publishers Ltd.
81. Maity, S., Bhattacharya, P, and Gupta, A.K. (1997): Preliminary phase equilibria study on the join forsterite–diopside–albite under 10 and 20 kb at variable temperatures and its significance. (Fyfe, W.S. volume) Gupta, A.K. and Kerrich, R. (eds.): Allied Publishers Ltd. 44-55.
82. Chattopadhyay, S., Chattopadhyay, B. and Gupta A.K. (1999): Preliminary phase equilibria study of the system nepheline-diopside-sanidine under 1 kbar in presence excess water. *Ind. Jour. Geol.*, (71, no. 1 & 2) , p. 81-91.
83. Gupta, A.K. (2000): Preliminary Experimental studies on the system Forsterite-Diopside-Enstatite at 700 kb and variable temperatures. *Deep Continental Studies in India Newsletter (D.S.T).* 10(2), 5-7.

84. Gupta, A.K., Dwivedi, M.M., Goswami, R.K. and Pandey, K. (2002): Experimental Studies under pressures up to 5.5 GPa and variable temperatures on Spinel Lherzolite xenolith in the basaltic rocks from Bhujjiya Hills. Gujrat., Deep Continental Studies in India Newsletter (D.S.T.). 12(1), 15-16.
85. Chopra, R, Dwivedi, M.M. and Gupta, A.K. (2008) : Experimental Study on the system $MgSiO_3-Al_2O_3-Cr_2O_3$ between 4 and 6 GPa at Different Temperatures with Special Reference to Pyrope–Knorringite Join. Science and Culture, 74, 5-6, 162-173.
86. Dwivedi, M.M., Gupta, A.K. and Arima, M. (2008) : Effect of Halogen-bearing fluid on Melilite-Plagioclase and Leucite–Sodic–Plagioclase incompatibility in Potassium rich tepritic magma. Science and Culture, 74, 5-6, 174-178.
87. Rai, A, Dwivedi, M.M., Gupta, A.K. and Arima, M (2008) : Measurements of Compressional and Shear Wave Velocities at variable pressure and temperature. Science and Culture, 74, 5-6, 179-183.
88. Dwivedi, M.M. and Gupta, A.K. (2008) : Electrical Conductivity of Diopside under 4 and 7 GPa at variable temperatures, Science and Culture, 74, 5-6, 195-198.
